Ideation Phase

Brainstorm & Idea Prioritization Template

Date	06 of March 2026
Team ID	69c103091466f700a6d324ef
Project Name	Smart Library Request Workflow in ServiceNow
Maximum Marks	4 Marks

Step-1: Team Gathering, Collaboration and Select the Problem Statement

Our team conducted a collaborative discussion to identify issues faced in traditional library systems. We observed that most library processes such as book requests, approvals, and tracking are done manually or through inefficient systems.

Problem Statement:

Current library systems lack automation in handling book requests, approvals, and tracking, leading to delays, poor user experience, and inefficient management.

Step-2: Brainstorm, Idea Listing and Grouping

During brainstorming, all team members contributed ideas freely. The ideas were grouped based on functionality and feasibility.

Generated Ideas:

- Develop an automated book request system
- Implement approval workflow for librarians
- Provide real-time status tracking for users
- Send notifications for request updates
- Maintain digital records of issued and returned books
- Create role-based access (Student, Librarian, Admin)
- Add search and availability checking system
- Generate reports for library usage

Grouping of Ideas:

- Automation Features: Request system, approval workflow
- User Experience: Status tracking, notifications
- Management System: Records maintenance, reports
- Access Control: Role-based login and permissions

Step-3: Idea Prioritization

The team prioritized ideas based on impact, feasibility, and ease of implementation in ServiceNow.

High Priority Ideas:

- Automated Book Request Workflow
- Approval System for Librarians
- Status Tracking of Requests

Medium Priority Ideas:

- Notifications (Email/Alerts)
- Role-Based Access Control

Low Priority Ideas:

- Advanced Analytics and Reports
- Extended Search Features

Final Selected Idea:

Develop a Smart Library Request Workflow using ServiceNow that automates book requests, approvals, and tracking, improving efficiency and user experience.
