Project Design Phase-II

Data Flow Diagram & User Stories

Date	13 March 2026
Team ID	69c103091466f700a6d324ef
Project Name	Smart Library Request Workflow in ServiceNow
Maximum Marks	4 Marks

Data Flow Diagram (DFD)

A **Data Flow Diagram (DFD)** is a visual representation of how information flows through the **Smart Library Request Workflow** system in ServiceNow. It helps in understanding how book requests are submitted by students, approved by librarians, and tracked by the system.

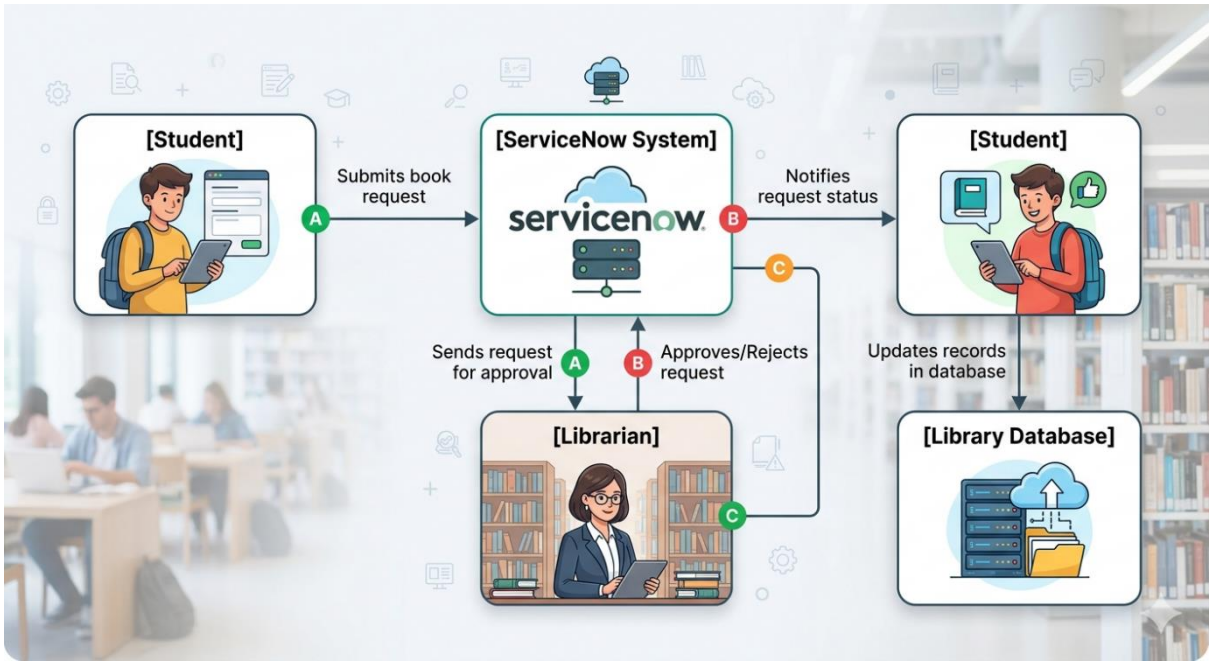
Key Features of the DFD for this Project:

- Shows how **students submit book requests**
- Displays **librarian approval/rejection** process
- Shows **notifications** sent to students about request status
- Depicts **data storage** for issued/returned books and user records

User Stories – Smart Library Request Workflow in ServiceNow

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance Criteria	Priority	Release
Student	Book Request	USN-1	As a student, I can submit a book request in ServiceNow.	I can successfully submit a request and see it in my dashboard	High	Sprint-1

		USN-2	As a student, I can check the status of my book request.	I can view Approved / Pending / Rejected status	High	Sprint-1
		USN-3	As a student, I receive email notifications about my request status.	I receive an email when the request is approved or rejected	Medium	Sprint-2
Librarian	Request Approval	USN-4	As a librarian, I can view pending book requests.	I can see all pending requests assigned to me	High	Sprint-1
		USN-5	As a librarian, I can approve or reject a book request.	Students get notified automatically after approval/rejection	High	Sprint-1
Librarian	Record Management	USN-6	As a librarian, I can update book records once issued or returned.	Database reflects correct issued/returned status	High	Sprint-2

Administrator	User Management	USN-7	As an admin, I can manage roles and permissions (Student, Librarian, Admin).	Role-based access is enforced correctly	High	Sprint-1
Administrator	Reporting	USN-8	As an admin, I can generate reports of library usage and requests.	Reports show correct requests and user activity	Medium	Sprint-2


Simplified DFD Example
