Project Name	Smart Library Request Workflow in ServiceNow
Maximum Marks	

Project Overview

Project Name: Smart Library Request Workflow in ServiceNow
Project Description: A workflow system to manage library book requests, approvals, and notifications in ServiceNow, including dashboards and reports for administrators and users.
Project Version: 1.0
Testing Period: 18 February 2025 to 21 February 2025

Testing Scope

Features/Functionalities to be Tested:

- User login and role-based access
- Borrow Request creation, submission, and validation
- Approval workflow for librarians
- Notifications for request updates
- Dashboard visualizations and reports
- Data filtering and calculation fields

User Stories / Requirements to be Tested:

- As a user, I can submit a borrow request for a book.
- As a librarian, I can approve or reject requests.
- As a user, I receive notifications for request status.
- As an admin, I can view reports and dashboards summarizing book requests.

Testing Environment

URL/Location: [ServiceNow instance URL]
Credentials:

- **Username:** testuser
- **Password:** Test@123

Test Cases:

Test Case ID	Test Scenario	Test Steps	Expected Result	Actual Result	Pass/Fail
TC-001	User Login Validation	1. Navigate to login page 2. Enter valid credentials 3. Click Login	User logs in successfully		
TC-002	Borrow Request Submission	1. Navigate to Borrow Request form 2. Select Book from list 3. Enter Request Date 4. Submit request	Request is created and status shows "Requested"		
TC-003	Approval Workflow	1. Login as librarian 2. Open pending requests 3. Approve or reject requests	Request status updates to Approved/Rejected		
TC-004	Notifications	1. Submit a request 2. Check user notification 3. Approve request as librarian	User receives notification for submission and approval		
TC-005	Dashboard & Reports	1. Open dashboard 2. Check visualizations: Total Requests, Requests by User, Pending Approvals	Dashboard displays correct data and visualizations		
TC-006	Data Validation	1. Submit request with missing Book Name or invalid date 2. Submit	System shows error and prevents submission		

Bug Tracking:

Bug ID	Bug Description	Steps to Reproduce	Severity	Status	Additional Feedback
BG-001	Notification not sent on request approval	1. Submit borrow request 2. Approve as librarian 3. Check user email/notification	Medium	Open	Ensure notification settings are configured correctly
BG-002	Dashboard shows incorrect total count for approved requests	1. Approve multiple requests 2. Open dashboard 3. Compare request count	High	In Progress	Verify calculation field for total approved requests
BG-003	Error message not displayed for missing Request Date	1. Leave Request Date empty 2. Submit request	Low	Closed	Validation logic updated to show error

Sign-off:

Tester Name: [Name of Tester]

Date: [Date of Test Completion]

Signature: [Tester's Signature]

Notes:

- All test cases include both **positive and negative scenarios**.
- Detailed bug tracking includes **severity, status, and steps to reproduce**.
- Feedback from testers should be documented for improvements.
- **Project Manager and Product Owner approval** required before deployment.
